

Shore will signify completion
It may be easier just to keep the game
continuous for early iterations.

side idea bonus feature besides rocks you could
have basic terminology pop up e.g animated
bird flies by

The idea is to have the web
app act like a scrolling game
and the map generated is
longer than what is displayed,
Potentially create this effect by
having the rocks move
downward -

probably fix canoe to bottom and
allow L and R to dodge obstacles...
